day surgery

coordination of Hospitalisation

– Hospitalisation Coordinators and Nurses oversee your admission process. They confirm your appointments and answer any questions. You will receive tailored support to ensure your stay is comfortable, seamless, and hassle-free.

If you have been referred to hospital by Medicover Centre, the coordinator will contact you first. If the referral is from outside Medicover, please call +48 500 900 628 and let us know that you require coordination.

Our Hospitalisation Coordinators and Nurses offer full support throughout the process – from the moment a hospital stay is recommended until you are discharged. Specifically, they will:

- identify the best facility for your treatment and arrange your admission date;
- coordinate your pre-admission care, including any necessary pre-op tests or consultations;
- help arrange post-discharge follow-up appointments and post-procedure rehabilitation (the Hospital+ plan does not cover rehabilitation);
- manage your admission and support you throughout your hospital stay;
- arrange medical transport whenever clinically required;
- remain available throughout your treatment to address any questions or concern.

HELPING YOU STAY HEALTHY
SO YOU CAN LIVE LIFE TO THE FULL

MEDICOVER INSURANCE

We look after our members' health so you can enjoy total peace of mind and live life to the full.

State-of-the-art treatment

Our hospitals use the latest medical technology to ensure precise, effective treatment. Modern, minimally invasive procedures mean less stress, greater comfort, and a faster recovery.

One of the leading centres for the **treatment of endometriosis** in Poland, which also carries out procedures for advanced stages of the condition.

Orthopaedic procedures and surgeries using the latest technologies.
